## Application overview

## Dimensions, terminals and mounting

**Note:** The final depth of the controller depends on the selected plug-in module – it can vary between 41 mm and 56 mm. Mind also the size of connectors and cables (e.g. in case of RS232 connector, add about 60 mm more for standard RS232 connector and cable).

**Note:** The controller is to be mounted into panel doors as a standalone unit using provided metal holders. The requested cutout size is 187 x 132 mm. Use the screw holders delivered with the controller to fix the controller into the door.
